

Pig Farm Auger Systems

Deba Brothers® is a leading China Pig Farm Auger Systems manufacturers. Dry feeding system include two different type system such as chain system and auger system. Pig auger auto feeding system named dry feeding system, we would give you our suggestion according to your pig farm. You can choose different sizes of pipe line and the driving unit to adapt to the different feeding volume. Normal service life is up to 10 to 15 years.

Product Description

The pig farm auger systems is one of the feeding systems produced by Deba Brothers® in China. Your feed – be it meal, pellets or crumbles – passes from the silo into the house safely and without any loss of quality. The pig farm auger systems range includes spirals, augers and conveyor chains of different sizes. The pig farm auger systems are the ideal option. Conveyor chains should be selected for very long conveying lengths and complicated building layouts.

Pig Farm Auger Systems Specifications

Item	Pig automatic feeding part
Size	It's can be design based on your farm
Advantage	Automatic equipment/Saving labor
Packing	By carton on non-woven bag
Deliver	20-30 days after the deposit

Pig Farm Auger Systems Accessories

Silo	2.6T/4.2T/5T/8T/10.4T/14.1T/19T/25.2T/31.3T
Main engine	1.5kw/2.2kw
Electric control box	Auger feed
Auger	Outer diameter:45.5/60.5/75mm Inner diameter:24.5/36.5/47mm

	Screw pitch:45/60/53mm
Quantitative tube	5L/6L

Pig Farm Auger Systems Advantage

1. Achieved automatic with feeding and data system statistics.
2. One breeder can feed 600 to 1200 heads sow. (For high bed no cleaning dung pig housing)
3. Save more than 50% labor wages, only need 1 minutes can finish the feed for 300 heads sows.
4. Increase more than 90% feeding frequency. automatic pig feeding system can fill 1,500 kg forge per hour.
5. Labours saved and cost reduced due to computer control system adopted
6. The adjustable transparent dispenser has 0.25kg to 3kg gears, which controls the weight of the pregnancy sow effect.
